

Mike Keemle
Solutions Architect—Security

Areas of expertise:

- Cisco ISE Security

As a Solutions Architect, Mike Keemle is accountable for enterprise networking infrastructure architectures. He also has responsibility for the integration between all architecture-related components, including networking, security and wireless solutions.

Mike joined OneNeck in 2002 and today, has more than 20 years of IT experience. His goal is to consistently help clients translate business requirements into scalable technical solutions. In addition to working with customers, Mike actively identifies new technologies and solutions, then facilitates integrating them into OneNeck's solutions portfolio. In addition, Mike trains an array of employees on the company's overall technologies. He has also created installation documentation and consistently identifies, and teaches, best practices.

Mike attended the Communication College of the Air Force and earned his Associate's Degree as an Instructor of Technical and Military Sciences.
